

Session 3: UN & other spaces for digital rights advocacy

Time zone 1: Friday, 9 August (7:00 - 8:30 UTC)

Time zone 2: Monday, 12 August (15:00 - 16:30 UTC)

Objective: This session will provide an overview of the different spaces available in the UN ecosystem and outside, including internet governance spaces that can be leveraged for digital rights advocacy. Understanding these spaces will help participants identify the relevant spaces and forums they must approach to advocate for different issues related to digital rights. Through looking at examples of important standards these spaces have created or instances of success, participants will be aided in modelling their advocacy. Limitations or failures of these spaces will help us understand areas that need more work.

Session plan:

Participants will be introduced to various global spaces for digital rights advocacy through case studies that examine relevancy of spaces to critical digital rights issues in focus.

The session will provide participants an opportunity to share their findings from the pre-preparation exercise detailed below, which will be followed by a presentation and interactive discussion.

Pre-preparation (to be completed and submitted to organisers on or before 8 August 2024):

Participants are requested to self-select one case study based on the issue that's most relevant to their work and context, and answer the following questions in relation to the case study:

- What are the key issues that must be taken up for advocacy?
- What are some of the spaces and processes civil society should approach to present and advocate for these issues?

Participants are requested to download the self-selected case study, and submit the completed exercise in docx or pdf form by email.

Case Studies:

Case Study 1: Freedom of expression online

- English
- Spanish

Case Study 2: Digital Inclusion

- English
- Spanish

Case Study 3: Gender and sexual rights online

- English
- Spanish

Case Study 4: Environment and technology

- English
- Spanish
